

## Forensic IT Services

BlackCitrus Forensic IT specialises in digital forensic and electronic data recovery and IT consulting services.

With our extensive knowledge and experience in the information technology sector, we are able to provide a specialised and personal service in this field.

We have close working relationships with a wide range of businesses, such as law firms, investigators, accounting firms, just to name a few.

Along with our staff that specialise in digital IT forensic and data recovery services, we also specialise in IT consulting services, such as infrastructure planning and installation and data security and integrity installations. Throughout this process, we also assist businesses with the development and review of their existing IT policies, as well as internet, email and security policies.

Our core business is providing IT security audits and implementing security strategies to improve the integrity of a businesses critical data and information.

### SOME OF OUR CORE ACTIVITIES INCLUDE:

- › Digital data recovery
- › Email recovery
- › Mobile Recovery
- › Data analysis
- › Data migration
